

ONDAMED was invented in Schwanau, Germany by electronics engineer, Rolf Binder. The technology is the result of 25 years of research in biophysical medical testing and therapy that resulted in the development of several well-known and sophisticated therapeutic devices. On the basis of this experience, Rolf Binder discovered how to interrogate the body's communication systems and introduce signals that stimulate the natural healing process. Medical professionals worldwide have been using ONDAMED with remarkable success for over a decade.

Over the past 50 years, scientists and engineers have developed various techniques for "looking" inside the body to diagnose disease and trauma. Examples include X-Ray, CT scans, MRI, Ultrasound, etc. Likewise treatments are provided by the energy from lasers, the Gamma Knife, and so on. Pulsed Electromagnetic Fields (PEMF) are yet another non-invasive break-through treatment modality. ONDAMED combines PEMF with pulse biofeedback to enable the practitioner to relieve pain, improve cell function and circulation, and promote relaxation.

"Patients with neuropathy who use ONDAMED® have up to 90% of their pain relieved."

Steven Bock, M.D., FAAFP, FACN, ACCUP

"The ONDAMED System often proves successful where no further biochemical means is able to prove effective."

Rashid Buttar, DO, FACAM, FAAPM, FAAIM

"90% (n=27) of patients with different types of pain recovered within 2 – 12 ONDAMED treatments"

C.A. Schroeter, M.D., Ph.D.
University Clinic Maastricht, Netherlands

"ONDAMED is more than a dream come true. It is better than anything I have imagined in my most optimistic fantasies."

James Oschman, Ph.D.
Author of books on energy medicine

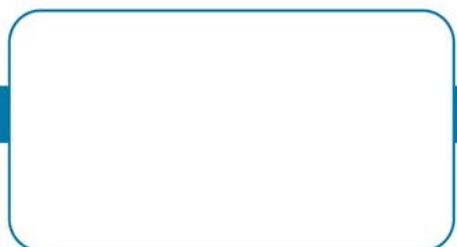

"ONDAMED for me is using old world medicinal concepts with advanced non-invasive technology. Optimum health and wellness is our mission and we are enthusiastic and thrilled to bring this technique to our patients at our Health and Wellness Center."

Karlene ChinQuee, M.D., F.A.C.O.G.
Gynecologic Surgeon & Functional Medical Practitioner

Stephen T. Sinatra,
M.D., F.A.C.C., C.N.S.

"The vibrational frequencies that are determined by sophisticated equipment like ONDAMED is perhaps a search for real truth. This is the future of medicine."

The Medical Technology combining focused EM-Fields with Pulse Biofeedback

Neurological Stimulation for

- Pain Relief
- Improved Circulation
- Promoting Relaxation

(((ONDAMED)))

... is based on the principle of electro-magnetic induction. The device produces a highly focused pulsed electromagnetic field that penetrates deep into a targeted region of the body to painlessly stimulate tissues and "jump-start" cellular activities.

The ONDAMED System complements other treatments, such as pharmaceuticals, homeopathic remedies, nutritional supplements and other therapeutic modalities; patients respond faster and the effects are longer lasting.

ONDAMED brings any practice to the cutting edge, as it incorporates and integrates the latest scientific findings about how the human body regulates itself.

A unique feature of ONDAMED is to enable the practitioner to monitor patients' responses to a wide variety of subtle electromagnetic fields introduced through a neck applicator, and select which frequencies or frequency programs are most appropriate. These signals are then introduced with a hand-held applicator and/or a larger matrix applicator.

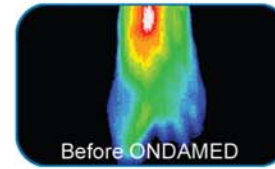

ONDAMED provides an effective, painless and non-invasive complement or alternative to other pain relief options, such as surgery or drugs. ONDAMED can enhance the effectiveness of conventional treatments and can speed recovery and reduce side effects.

James L. Oschman, Ph.D.

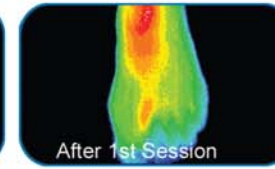

Author of books on energy medicine:

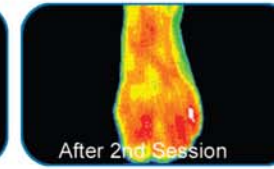

ONDAMED has an ingenious design derived from decades of careful research from around the world. I particularly like the gentle way the stimuli are applied, as many other devices introduce far more energy into the body than is needed for diagnosis and treatment. Research has shown that the human body actually responds better to small signals than to strong ones.

Before ONDAMED

After 1st Session

After 2nd Session

A 67 yr old male was treated for pain and swelling on his left foot after a 100lb case fell on his foot 3 months prior to treatment. Thermographs taken before and after two 30-minute ONDAMED treatments applied within a one week period reveal how quickly an inflamed area (see white spot) dissolves; thereby improving the circulation indicated by the red/yellow color scheme.

ONDAMED is a comprehensive system that focuses on underlying conditions rather than symptoms. During a session, a patient sits comfortably fully clothed in a

chair or lies on a table. Patients may experience a mild tingling sensation, a feeling of warmth, or nothing at all. A typical treatment lasts about 30 minutes. Patients consistently report leaving a session feeling less pain, more relaxed and refreshed, able to think more clearly, and better prepared for life's challenges.

"When there is a departure from a healthy synchronous vibration, these parts display a lower energy or a chaotic asynchronous vibration. Just as micro-magnetic fields exposed to induction impulses produce electron flow, ONDAMED impulses convert static and blocked non-regulating areas to dynamic functionality."

Mechanism of action:

- adds energy through natural resonance effects
- raises the electrical potential of tissues that are in a weakened state
- restores normal functions
- promotes relaxation as evidenced by changes in brain waves
