

A True New Dimension in Health and Medicine

Part II

Part I of this two-part series appeared in Explore!, volume 12, number 5.

Review from Part I

ONDAMED means “medicinal wave”. It is an induction rebuilding the electromagnetic life field of diseased tissue. It does this by the application of specific waves to non-functional parts of the body.

Both the blocked tissue and the necessary specific induction-wave are found by a simple pulse test in cooperation with the ONDAMED device. The wave range is between 0.1 and 32,000 Hertz at 60 milli-Tesla. By producing a specific single wave for each individual patient, the system works very powerfully and effectively. Special brain programs eliminate pathological impulses stored in the CNS. 172 well-designed programs are effective for a wide spectrum of health disorders. Other frequencies of the system work to balance microorganisms. This biofeedback system, based on the patient’s V.A.S. (vascular autonomic signal) is essential for both symptomatic and systemic application. However, you need to follow strict rules to counteract chronic illness. ONDAMED is a must and a basic tool for any therapist in the 21 century.

It is all about influencing, rebuilding, and “retuning” the “Life Field”, according to Burr.

Starting From the Top

Do you value your teeth? I do. However, I have come to this the hard way. I don’t know why so many of us live through a period of neglecting them. A typical event: my son, Daniel, who is studying medicine at Nova Southeastern University in Fort Lauderdale, called me the other day with a typical story:

“Dad, I had to go to the dentist to get rid of a sensitive teeth sensation. My teeth started hurting, having a cold drink. There is also a cavity in one tooth, but that doesn’t hurt so far. The dentist was an extremely nice and kind doctor, and he took a long time to explain that I should have my wisdom teeth pulled. In the long run, he explained, they could impair my other teeth and the whole jaw.”

“So he did not directly respond either to your teeth sensitivity or to your cavity,” I replied, “and did you tell him about your previous three-week trip through the States and New Orleans with your friend, living mostly on fast food and Coke?”

To make a long story short, it took me an hour to convince Daniel not to revisit that dentist. Instead I asked him to change his diet, get homeopathic mercurius solubilis D12 and hepar sulfuris D12, each 3 times per day, and get another dentist to fill up the cavity.

My son was saved from dental damage, in contrast to myself many years ago:

“This tooth must be pulled,” I said to my dentist years ago, when I found a small cyst under it by X-ray. I had the same attitude concerning my teeth as many of us have: pull it and the problem is solved! Just like getting rid of junk and ending up with a “clean new body.” Instead of approaching the cyst from the side, the dentist pulled the healthy tooth.

Of course, there were complications, since the tooth was healthy and strong. The manipulation opened part of my maxillary sinus, the tooth broke and parts of the roots remained in the upper jaw, causing recurrent swelling and inflammations over the years. A later attempt of a second operation failed, except for the bill I had to pay. Gradually the adjacent teeth, carrying the bridge, started to become unstable and jerky. Recurrent inflammations made me chew on the other side.

ONDAMED made the difference in that stalemate. After one ONDAMED session there was less sensitivity, less pain, less swelling, and less instability in that area. A few more sessions produced complete stability for several weeks. This was astounding!

Although I know that guarantees in the medical profession are somewhat insincere, I am inclined to guarantee the effectivity of ONDAMED in such tooth problems.

The same guarantee I would like to give to people with a burn injury. If you are sceptical about Homeopathy, take Cantharis C30, five pearls every 2 minutes, if you for instance encounter a burn at your hand. Continue that a few times and in the meantime dissolve 20-30 pearls of Cantharis C30 in a large glass of water. Stir with a plastic spoon—no steel spoons! After dissolving the pearls, continue to take 2-3 sips of the fluid every two minutes instead of taking five pearls. In about 30 minutes you will be pain-free and there will also be no blister. Cantharis C30 belongs into your emergency kit!

Back to the Teeth

Ever since we have started to use ONDAMED, we always simultaneously apply the patient-specific waves to

the teeth and gum area with the hand-held area applicator. Remember: ONDAMED and the therapist first have to find the specific waves for each patient by a simple pulse test. It takes about three minutes.

After being a doctor for 30 years with extensive studies in holistic medicine, I have concluded: Do not pull a tooth if ever avoidable. ONDAMED is a capable and effective approach to both dental and associated jaw problems.

Any bone structure is affected positively. We use the system with great success for Osteoporosis. It is wrong to assume that bone cannot regrow. We see this all the time in fractures, etc. I wish Camilla Parker would read this, since she seems to be ailing from Osteoporosis.

Do you Own a Cell Phone?

Sooner or later you realize that something isn't right with you. You may guess that the steady and continuous umbrella of pulsed cell phone waves may affect your vigilance, your strength, and your energy. You may attribute the loss of flexibility and youth in your body to the ongoing exposure to the cell phone. You are perfectly right with your diagnosis: The wave spectrum of your cell phone is not only hurting your ears, but your entire nervous system.

Program 47 (*Interference*) of ONDAMED is returning you within 4 minutes. In fact we use it almost daily in our clinic to erase all kinds of e-smog.

Scrolling through my patient's records I realize an increasing number of recurrent lung infections, such as severe bronchitis or pneumonia with growing age. When we go into sophisticated Electrodermal Screening to find the cause for chronic disease including cancer, we almost always detect a smoldering pneumonitis and pneumonia in the patient's past. Program 153 (*atypical pneumonia*) has solved many such cases and opened the road for effective treatment.

As I wrote in Part I, the electromagnetic life field (*L-field, Burr*) is built up by ONDAMED. I remember a woman in New York State who was involved in a motorcycle accident with multi-trauma, years ago. Her spleen had to be removed and her body was covered with scars after healing. After scrolling through ONDAMED's 172 programs, there was a pulse reaction at number 90 (*scar tissue*). The patient instinctively applied the waves to the scar on her left foot. The result was unbelievable: A few days later the scar opened up, began bleeding, some thread and blackish substance came out, and her left ear—somewhat deaf after the accident—opened up. Ever since she has been able to use the phone with her left ear again.

This showed me that the body's ability to repair tissue damage could be enhanced by improving the L-field with ONDAMED.

Last year I received an exciting phone call from Dr. Fulford of Tennessee, who was absolutely thrilled after applying the ONDAMED to a lady doctor with deep abdominal and femoral thrombosis. She had been on Coumadin for several weeks already, but appeared

to remain "non-responsive" to conventional efforts. The pain and discomfort was not acceptable. Several programs were found through pulse testing, and scrolling through frequencies for microorganisms not only found Salmonella, but also gave spontaneous relief as demonstrated by THERMOGRAPHY, before and after. "I want the world to know about this," exclaimed Fulford into his cell phone, who at the time was participating in a convention in California.

Many of us may not be aware of the importance of our lymph system. Think of a bath tub which is rapidly filling up from two open spickets. If you cannot quite turn them off, it will not take too long until you either have to pull the plug or contact your insurance company to claim the damage. By cleaning the tissues, the lymph system is our greatest ally to prevent any disease, including cancer. The fact that our food metabolites also migrate into the lymph is creating a major health threat. If the lymph is already blocked by environmental and body toxins, the food is largely responsible for plugging the system up completely. In particular, food intolerances such as dairy products, wheat, and gluten cause acidity, because they cannot be broken down completely. As half-broken-down "macromolecules", they are extremely toxic. The overload of EBV (*Ebstein Barr Virus*), CMV (*Cytomegalie Virus*), and HSV (*Herpes Simplex Virus*) in many degenerative diseases and cancer can be explained by the acidic milieu in the lymph. Not being aware of food intolerances, we feed ourselves into a disaster. In any case of disease and if you feel "fed up" with your health condition, I recommend: Leave the key allergenic foods, e.g. milk products, gluten, and wheat for a while until you are uphill again. However, to cleanse and revive the lymph system, we utilize program number 72 (*detoxification*). This is tested very often and shows the importance of metabolic toxification.

We all know that psychosomatic factors contribute to many health problems. We are reminded almost daily, scrolling through the programs, how important it is to approach the patient on that level. Pulse testing gives us clear hints when program 23 to 34 repeatedly respond on a patient. It even gives us a percentage of how much a health problem is controlled by the psyche. Recurring data clearly lead the therapist onto the right road to take steps both with the ONDAMED and other means, e.g. consulting, allopathic, herbal, bach flowers, or homeopathic treatment.

ONDAMED produces single resonating waves matching with brain waves. Brain waves operate below 14 Hz. There are standard programs for the alpha, beta, theta, and delta waves, which are providing both analytical and therapeutic tools to the therapist.

Currently we are doing research on the Cadmium point, which is located between the coccyx and the right pelvis. We found that Cadmium seems to be quite often associated with ALS, a deadly disease of neural and muscular atrophy. ♦
