

A True New Dimension in Health and Medicine

Part IV

Live is too short to be small – Benjamin Disraeli from “Thought of Ira Brind”

Review from Part I and II from my publications in EXPLORE, volume 12 number 5 and 6, 2003:

ONDAMED means “medical wave”; patient-specific waves create an induction in the different layers of the body stimulating the electromagnetic life field of diseased tissue. This technology is all about finding the non-functional parts in the body, and simultaneously regulating them.

Both the blocked tissue and the necessary induction-wave are found by a simple pulse test in cooperation with the device. The wave range is between 0.1 and 32.000 Hertz up to 60 milli-Tesla. By producing a specific single wave for each individual patient, the system works very powerfully and effectively. Special brain programs eliminate pathological brain impulses stored in the CNS.

173 well-designed programs are effective for a wide spectrum of health disorders. Other frequencies of the system work to balance microorganisms. This biofeedback system, based on the patients V.A.S (vascular autonomic signal) is essential for both symptomatic and systemic application. However, you need to follow strict rules to counteract chronic illness. ONDAMED is a must and a basic tool for any therapist in the 21st century.

It is all about influencing, rebuilding, and “retuning the Life Field”, according to Burr.

6 Weeks Ago In My Clinic

“We do not know, how to handle our old mother any more”, said her son sitting opposite to me in my consultation room.

“Only her corset is holding her together and she has this constant unbearable pain in her bones and spine. The osteoporosis started in her fifties and left her now totally disabled with 86. Of course she cannot walk by herself. Even crutches won’t do it because her bones are virtually crumbling and cracking apart. Is there anything you could do for her? “, he added with a clear doubt on his face.

Looking at him, I remembered another patient with a fractured spinal lamina, after he slipped and fell down a marble stairway. He was like a turtle on his back, unable to move around and overwhelmed by pain. The Biofeedback System’s “bone specific” program gave relief within 3 days!

I also recalled a male asthmatic patient, who had multiple fractured spinal bones after using cortisone for decades. He could

walk on crutches again after 10 days of applications with the Pulse Biofeedback System’s special program for osteoporosis.

You may remember my previous publication in EXPLORE; the relief this device gave me for my destabilized tooth, which bothered me after a dental malpractice surgery by having been pulled a healthy tooth.

So, this 86 year old lady was scheduled for the same biofeedback protocol, which turned out to be miraculous. The code for the frequency setting is added below for your information.

- Right frequency: Frequencies are running from 8 Hz to 101,59 Hz
- Left frequency: 450.14 Hz
- Intensity: 8
- Time individually tested by pulse feedback or kinesiology

Just considering osteoporosis, this powerful device is a true new dimension in biophysical medicine for the 21st century. However, after a short historical journey I will explain other healing issues which have become a mile stone so far.

Life Is Physics

How did biophysics, all of a sudden become so prevalent in medicine? The answer is: Life is physics.

The discovery of X-ray started the era of physics for the medical world about 100 years ago.

Another electromagnetic method, which had been considered impossible by experts, is part of our daily routine since 1970 – the Magnetic-Resonance-Imaging (MRI). Just recently the New York Times published an article that MRI shows promise for Depression Sufferers as published in the January 2004 issue of the American Journal of Psychiatry.

First time in 1979, Jerry I. Jacobson used extreme weak electromagnetic fields (10 pico Tesla) for treating a variety of diseases including cancer. Jacobson’s Resonance is based upon Einstein’s algebraic Unified Field Theory combining electricity, magnetism, and gravity.

New biophysical therapeutic systems have been developed in Germany for 30 years such as BIORESONANCE, QUINT System, and the ONDAMED System. They are used effectively and successfully and each method enriches the existing body of medical

therapies enormously. However, Bioresonance is limited. The key word of healing seems to be Bioelectromagnetism.

The use of physics in the medical world and especially the use of Bioelectromagnetism as a tool in therapy evolved in the middle of the previous century. Today it appears to become the medicine of the 21st century. There is a continuous growing body of knowledge in theory, experimentally, and clinically and we have accumulated about 10,000 reviewed publications worldwide including Russia and India.

Above all, the world of physics has given birth to new functional understanding for the over 250 years of Homeopathy, the science the fine-toxicity of substances to humans and animals. This method is believed to operate in the fifth and sixth dimension. According to Burkhard Heim, a German physicist, the world formula seems to have six dimensions. This has been fully mathematically proven at the DESY.

Kinesiology – a therapeutic giant – is based on so called “energy fields“. Callahan, for instance, proved the superiority of his “TFT Thought Field Therapy” over conventional psychological methods, which are often used fruitless over years in cases of phobia.

“If there are new discoveries“, Max Planck said, “it is not that everybody will be convinced. However, they who do not comprehend them will die out“.

The Method of Vectorizing

This Pulse Biofeedback System is more than pushing some buttons to assist with the repair of bone fractures or osteoporosis. Above that, it is capable to influence systemic diseases including psychological disorders very well. However, as I mentioned before, you should adhere to consistent rules.

This has something to do with the Vectors of the underlying causes of the disease. The mathematical interconnectedness of several factors, each of them pulling at each other, are causing a very different and yet specific results. For instance:

Father has financial problems and is yelling at his wife to bring him a beer. She is cooking and diapering her daughter, who is lying on the kitchen table. Mother gets scared by father’s outburst and is hunting for a beer in the fridge. Meanwhile the baby is rolling off the table contracting a bleeding head injury. Although the main issue is now to treat the baby’s head wound, we still have to work on the emotions both of the father and the mother in order to bring the family back to balance and to avoid further damage elsewhere.

Therapists have long understood that a certain treating-sequence has to be followed in order to heal on deeper levels and not only to improve a condition a little bit (Karz).

Different Systems Use Different Approaches

The Quint System, for instance, uses a complicated, but effective, computerized testing method through electro-acupuncture. It finds almost any cause and factors which clear the diagnosis including radioactive substances and specific emotional trauma such as child abuse, suicidal tendency etc. The energetic therapy is then applied by Schuhmann waves plus all specific signals such as radionuclid elimination, bacterial elimination and so forth.

Very interesting concerning treatment of bacteria for instance is the bacterial vector.

A coli infection, for instance, could reveal Staphylococcus, Streptococcus, Mycobacteria, and Clostridia. As E.Coli does not show up in the testing, it is believed that the other bacteria are actually responsible for the pathogenesis of E.Coli. Consequently this vector is used to treat E.Coli infection although it does not contain E.Coli.

This phenomenon reminds me of Chinese healing plants which, as single plants, do not have any effect, but mixed in a certain mixture become a powerful remedy. The same goes for the bacterial vector. A few mycobacteria may not have any impact on health. However, in combination with Staphs, Streps, and Clostridia they are causing E.Coli to become pathogenic. Of course this systemic approach is time consuming, expensive, but effective.

This may explain the reason for patients often resonating with certain microorganism-specific frequencies on the Pulse Biofeedback System, which did not test positive with Electroacupuncture. By applying these found microorganism-specific frequencies, the patient improves.

Since we are dealing with the electromagnetic field in order to restore health, plain electromagnetic devices – without additional signals of medications - should do the job. It is postulated (Karz) that the ONDAMED should be of sufficient help here and nothing else is needed. 🌸

ABOUT THE AUTHOR

Dr. W.G.D. Kessler, M.D. completed his medical exams both in Germany and the U.S. He participated in lung transplants at Montefiore Hospital in New York in the 1970s with Frank Veith, M.D., and has specialized in the treatment of chronic diseases since 1980. Dr Kessler’s interests later shifted more toward biophysics, homeopathy, immunology, and Chinese plants. In 2002 he began introducing the ONDAMED System in the United States with numerous presentations to American Integrative Medicine Practitioners. Most recently the System was presented in Gengenbach, Baden Baden, and Hannover, Germany, and again in the U.S. in Phoenix, AZ on September 6, 2003. In 2003 Dr Kessler was asked to join the Advisory Board of Integrative Medicine at Thomas Jefferson University in Philadelphia, PA. Dr. Kessler is 57 years of age and currently manages a well equipped international clinic for holistic medicine near Emden, in northern Germany, with a 20-nurse staff.
